Safety

This unit complies with the statutory safety regulations. Improper use can, however, lead to personal injury and property damage.

To handle the unit safely, follow the instructions below:

- Check the unit for external, visible damage to the housing, the supply cord and the plug before using it. Do not put a damaged unit into operation.
- Repairs are only allowed to be performed by a specialist or by the Graef customer service department. Improper repairs can lead to extreme hazards for the user. Furthermore, the warranty claim expires.
- Only Graef customer service is authorised to repair the unit during the warranty period, otherwise the warranty expires for additional damages.
- Defective components must be replaced solely with genuine spare parts. Fulfilment of the safety regulations is only guaranteed if these parts are used.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children unless they are older than 8 years and supervised.
- Keep the appliance and its cord out of the reach of children less than 8 years.
- The unit is not intended to be used with an external timer or a separate telecontrol system.
- This unit is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels and other residential type environments; bed and breakfast type environments.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service or

similary qualified persons in order to avoid a hazard.

- Always pull the supply cord from the electric socket using the connector plug, not on the supply cord itself.
- Do not carry the unit by the supply cord.
- Never transport the unit during operation.
- Use the unit only when it is standing upright; never put the unit into operation if is lying on its side or upside down.
- Be especially careful when opening the cap; the contents in the unit tank can squirt out.
- Do not move the unit while it is switched on. While moving, hot liquid can escape from the unit.
- Switch the unit off before cleaning and pull the power cord from the electric socket.
- Let the unit cool off before cleaning.
- Do not use any aggressive or abrasive cleaning agents and do not use any solvents.
- Do not scratch off stubborn soiling with hard

objects.

- Never immerse the unit base, the tank, the connection cable or the connection plug into water or any other fluid.
- Do not clean the unit or any of its parts in a dishwasher.
- Do not use the packing material as a toy.
Danger of suffocation.
- Follow the instructions regarding the requirements for the place of installation and on the unit's electrical connection to prevent personal harm and property damage.
- Never touch rotating parts of the unit.
- Never put objects or body parts in the unit while it is running.
- Never leave the unit unsupervised during operation.

Fill the unit only up to the respective mark. If overfilled, hot liquid can emerge from the tank.

Unpacking

To unpack the unit, proceed as below:

- Take the unit out of the carton.
- Remove all pieces of the packing.
- Remove any possibly extant labels from the unit (do not remove the rating plate).

Requirements for the installation location

For safe and flawless operation of the unit, the place of location must meet these prerequisites:

- The unit must be set up on a firm, flat, level, non-slip and heat resistant base that has sufficient load bearing capacity.
- Select the place of location so that children cannot reach the hot surfaces of the unit.
- The unit is not intended for installation in a wall or a built-in cupboard.
- Do not set up the unit in a hot, wet or moist environment.
- The electric socket must be readily accessible so that the power cord can be easily unplugged.

Before the first use

Remove the protective cap between the base station and the tank. Before using the unit for the first time, clean as described in the **Cleaning** chapter.

Making milk froth

Connect the unit to the mains supply:

- Remove the cap and insert the attachment  milk froth.
- Fill the desired amount of milk in the tank.

Comply with the “max” mark. Never fill any more milk than that into the tank. Frothed milk expands; if the filling level is too high it will overflow the tank.

- Put the cap on the tank.
- Start preparation by pressing the corresponding “on” button. The LED is illuminated as long as the unit is running.
- Open the cap after preparation has finished and pull it up.
- Pour or ladle the milk froth into a cup or glass.

- After using the unit, clean it as described in the **Cleaning**

Hot chocolate and instant drinks

- Remove the cap and insert the attachment  for hot chocolate or the attachment  for instant drinks.
- Add all ingredients and use the upper button.
- After using the unit, clean it.

Warming up milk

Warming up milk differs from making milk froth in the following points:

- Remove the attachment for milk froth.
- Fill the desired amount of milk in the stainless steel tank.
- The rest of the steps are identical to making milk froth.

Cleaning

- Clean the exterior of the unit with a soft, moist cloth. If heavily soiled, a mild deter-

gent can be used.

- Rinse out the tank with hot water after use. If there is stubborn soiling in the inside of the stainless steel tank, wash it out with a soap solution and rinse thoroughly.

Customer service department

If your Graef unit becomes damaged, please contact your dealer or the Graef customer service department.
